Malyeyev Nikita

Full-stack developer (1.5 years of
commercial experience)

+38 (095) 341 52 93
maleev2017@ukr.net

I am a JavaScript Full-stack developer with 1.5 years of commercial experience at a product company. I have hands-on experience in both back-end and front-end development. On the back end, I work with technologies such as Node.js, Express, MongoDB, PostgreSQL, Redis, Kafka, and BullMQ. On the front end, I work with React, Ant Design, Next.js, Redux, MobX, Zustand, Styled Components, and Tailwind. My focus is on writing clean, maintainable code and ensuring seamless integration between front and back ends to deliver scalable solutions..

Skills

- English: B1
- Programming Languages: Typescript, JavaScript
- Back-end: NodeJS, Express, NestJS, PostgreSQL, MongoDB, Prisma ORM, Kafka, BullMQ, Redis, AWS
- Front-end: React, Next.js, Vite, React Router, Ant Design, Redux, MobX, Zustand, HTML, CSS, Styled Components, Tailwind

Work Experience

Full-stack developer

Klickly

May 2023 – Oct 2024

I worked at Klickly for 1.5 years as a Full-Stack developer, where my primary responsibility was developing full stack features based on business requirements.

We developed a complex advertising platform for Shopify brands from the ground up, beginning with only Figma designs. Throughout the process, I was responsible for converting these designs into React code, implementing API routes, and creating database models. I also made strategic decisions and implemented cron jobs or queues as needed, along with managing caching to optimize performance

Education and Certifications

Front-End dev certification

A-Level Ukraine

Sep 2022 – May 2023

React Practical Marathon

SoftServe Academy

Mar 2023 – May 2023
